

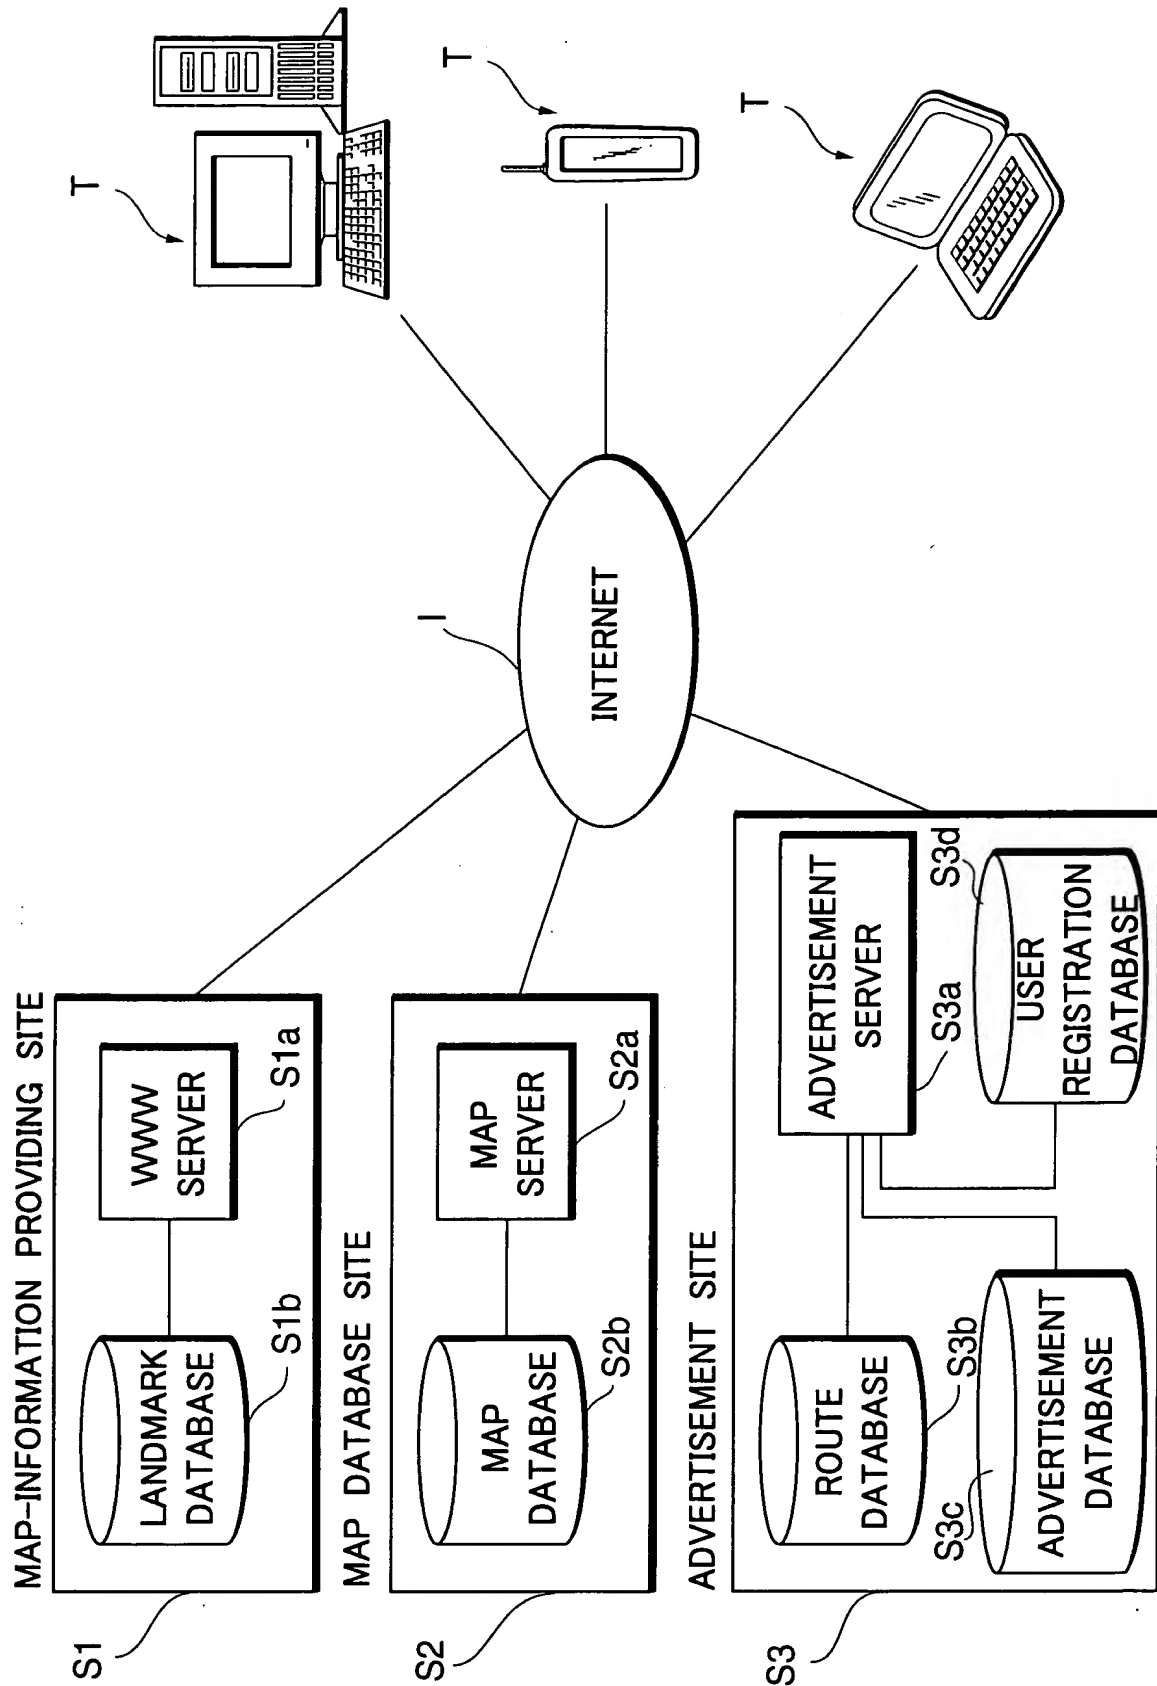

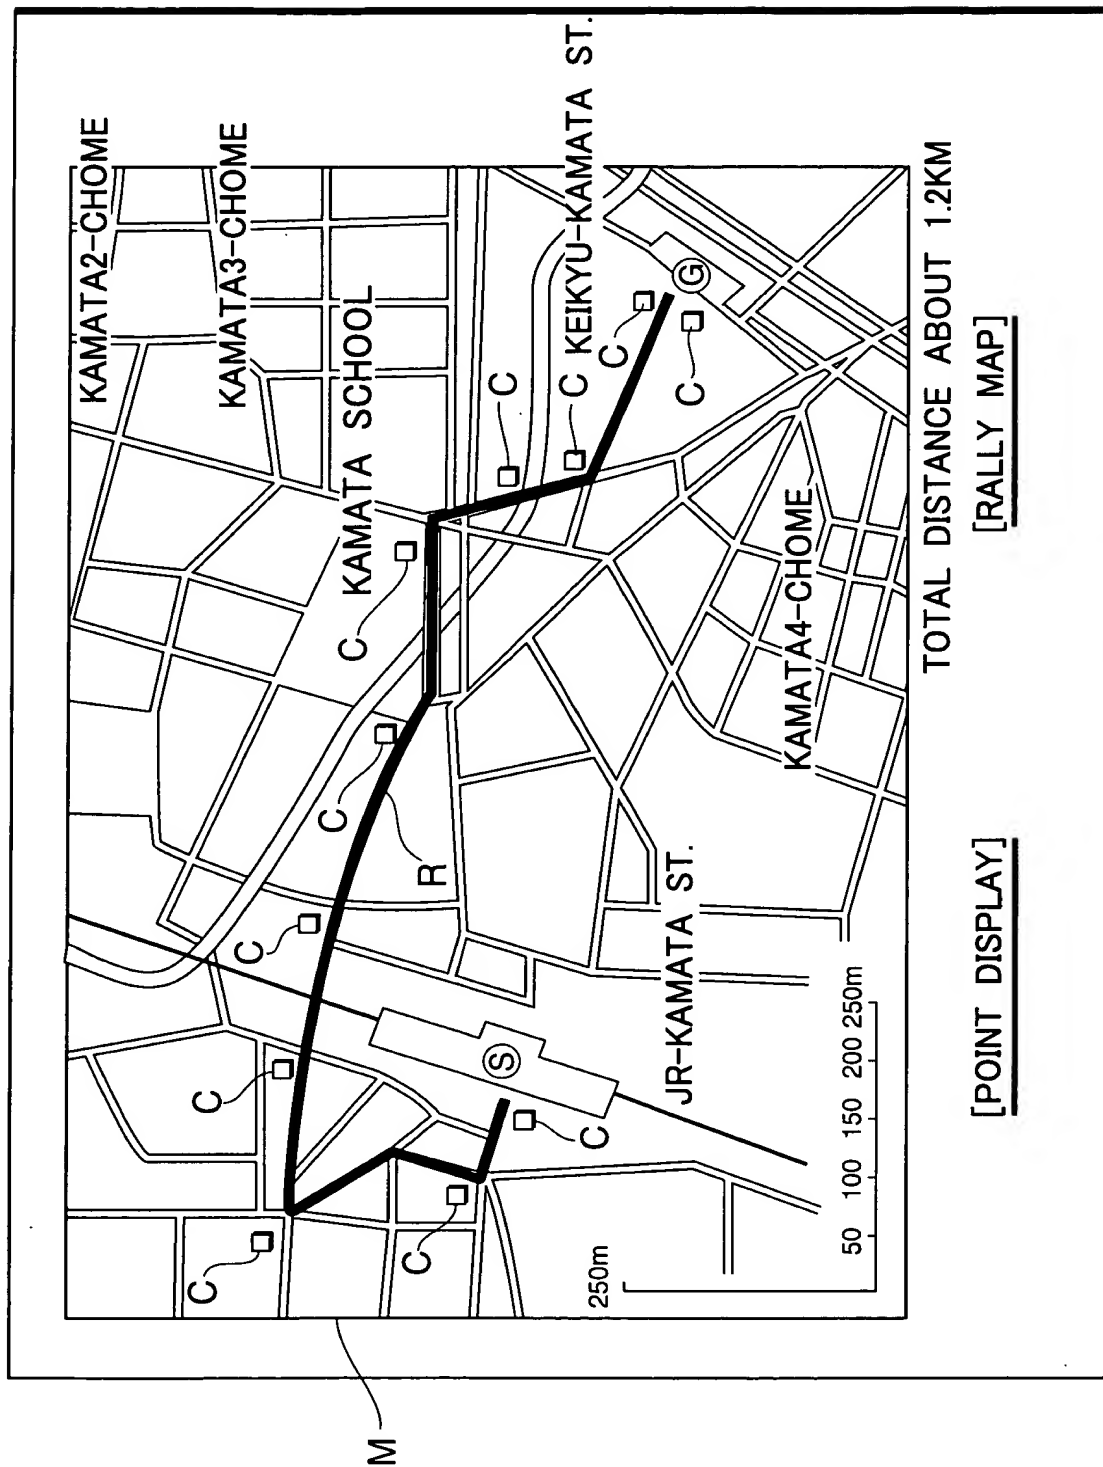

FIG. 1

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$ in both cases (both if x and y are functions of time).

1. The first group of people who are interested in the study of the history of the world are the historians. They are the people who study the past and try to understand what happened and why it happened. They are the people who write the books that we read in school and in university. They are the people who tell us about the lives of the great men and women of the past. They are the people who help us to understand the world that we live in today.
